## PRODUCTION DESIGN

February 24, 2013

To whom it may concern:

Curtis Laseter has been my construction coordinator on numerous film and television projects. He is a very resourceful and effective manager of time, budget, and crew. His broad range of knowledge has been an asset that I have drawn upon many times.

And just as important as his management skills is the positive attitude Curtis brings to each project. No matter what the budgetary or time constraints may be, he is always ready, willing, and able to complete the most difficult tasks. This positive attitude is also reflected in the crew that Curtis has put together for all our projects. The carpenters, painters, plasterers, welders all know they are in good hands with Curtis at the helm. And they all know he will go the extra yard to make sure that everyone has the tools and time to get the job done. Because of his attitude, Curtis is able to attract the best people available.

You couldn't have a better coordinator at your side than Curtis Laseter.
